

Black and White
Story written by etwinners in
this project.

Once upon a time the world was black and white. The trees were black and white, the Sun was white and even the water was white, but fish were black. People had black or white skin and they like wearing opposite colours clothes: the white-skin like black clothes , the black-skin preferred white.

One day.....

Chapter one

By José Arnauda School in Spain

Something strange happened. People with black skin had white spots in their bodies and people with white skin had black spots.

At the beginning, they thought they were ill and the streets were empty. People were very sad and crying, except one child who seemed to be excited and had no spots.

This boy went to a cave during the weekend and found a small Leprechaun that was not green because he had a striped body.

The leprechaun told the child how to cure the rest of the people.

They went together to a forest to look for the ingredients but these ingredients didn't exist in Spain. They had to go to

....

.... the UK.

In the UK they found some ingredients which have protected geographical status. The ingredients they found were Clotted Cream and Worcestershire Sauce which they mixed together. The leprechaun said that they needed to rub it into their skin, which they did, and all the spots disappeared.

“Fantastic!” they said.

“We’re cured!!!”

*“Wonderful”
said the leprechaun,
“My job is done”.*

*The boy was happy
but suddenly...*

“Aitchoo!” The boy started to sneeze and he couldn’t stop.

“Oh no!” said the leprechaun. “I think you might be allergic to the cream.”

*“Here!, drink this salt water
from the English Channel,
which will heal you and stop
you from sneezing”*

*The boy drank the water instantly
and he stopped sneezing.*

*“Brilliant” said the leprechaun,
“You are cured!”*

*The boy was happy and then
suddenly*

The spots reappeared.

“Oh no!” said the leprechaun. “The salt water must have affected the ingredients and made the spots come back.”

They came
to Poland.

The leprechaun showed him the herbs which they need. They went to the forest

A black and white illustration featuring two stylized human figures in the center, surrounded by tall, thin stalks of grass or reeds. The figures are drawn with thick, expressive white lines on a black background. The figure on the left is slightly taller and has a more upright posture, while the figure on the right is shorter and appears to be leaning forward. The background is filled with numerous small, circular, textured shapes that resemble seeds or small flowers, scattered across the scene. A white rectangular text box is positioned in the upper right quadrant of the image.

They were walking and walking ,
but they couldn't find these
herbs.

Leprechaun and boy decided to go to the forest next to Olsztyn. .

They were walking and
looking around

Suddenly they found a small lake with the pier in the middle in of the forest.

They went on the pier and they noticed herbs under the water.

The herbs were a looked like algae.

The boy dived into the
cold , crystal water

and picked some
leaves.

They were
magical.

When he touched them they started to shine.

More over the boy also started to shine.

In that moment he saw perches and a big pike among them.

The pike swam up to the boy and took algae but the boy was able to take them back from the pike .

The boy surfaced and gave the herbs the leprechaun .

**The leprechaun made
shining mixture.**

When the boy had drunk it , spots disappeared boy's skin started to glow.

**The leprechaun said :
We have to go to**

.... Croatia.

In Croatia they
sought a special
ingredient for their
drug - lavender oil.

In Spačva, the Slavonian forest, in the twig of centuries-old oak lived a magical purple owl. In order to give them a bottle of oil they had to bring a bag of magic acorn that cleans garbage from the forest.

It grew near Vinkovci.
An leprechaun and a
boy walked down the
forest and noticed the
magic oak which was
three times the size of
other trees.

When they approached
it, some weird bugs
attacked them.
They started to run, and
then the leprechaun
had an idea.

He took the powder out of his bag and spilled it over the bugs, who immediately got remarkably smaller so they could pass them and take the acorn and get back to the owl.

The owl put the magic acorn in a machine which cleaned the forest from garbage.

The boy and an leprechaun received a bottle of lavender oil. They couldn't produce their drug because they were missing another ingredient for which they went to...

They went to France-Charleville Mezieres and in there the region is called as Ardennes that is famous for Forests. So students decided to go to the Forests of Ardennes and find the herbs that heal all people with white and Dark Spots.

To get in to Forest Students
have to go across the Bridge
On the Bridge They came into a
Rabbit. Rabbit asked them?
Where are you doing in here?
Students explained. And Rabbit
told them the Vervaine an Endemic
Herb that grows in Ardennes.

Students walked in the forests
and picked all the herbs. They
tried to make a tea of Vervaine
herb and drink it.

That Endemic Herb Vervaine can
help but that is not enough.
They need one more ingredient so

They went
